

Dear Iowa Utilities Board members,

I encourage the Board to move the permit hearing for Summit Carbon Solutions' proposed carbon capture project to July of 2023. As the vice president of the Iowa State University Iowa Corn Growers Association Collegiate Club, I believe the Farm Bureau's suggestion that the hearing is held in July is the best option for Iowa farmers.

The current proposed schedule will cause too much difficulty for the farming community. Kindly reconsider, and perhaps revise the date for July.

Respectfully,
Nick Fischer
